Summary

Full-stack developer with four years of professional web development, mostly PHP, Laravel and WordPress for agency clients, and more recent work in React, Node.js, TypeScript and Python. Finishing a Master's in Software Engineering at Memorial University in April 2027. Available for a Winter 2027 internship and full-time from May 2027, in St. John's, remote, or relocating to Toronto, Calgary or Vancouver.

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, PHP, SQL, Java, HTML, CSS
- **Frontend:** React, Next.js, Tailwind CSS, Bootstrap, jQuery
- **Backend:** Node.js, Express, Laravel, Flask, REST APIs, JWT authentication
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase, Supabase, Mongoose, TypeORM
- **Testing:** Jest, Vitest, Pytest, grammar-based fuzz testing
- **Tools:** Git, GitHub, Vercel, WordPress, WooCommerce, cPanel

Web Development Experience

Web Developer · HYPE Dhaka · Dhaka, Bangladesh · Jun 2018 – Jun 2022

PHP, Laravel, WordPress, WooCommerce, MySQL, JavaScript, jQuery, HTML, CSS

- One of two developers at a small digital agency. Built 12 client websites, mostly on WordPress and WooCommerce, and maintained 5 live client sites.
- Built a contest site in plain PHP and MySQL for a client's two-week promotion. It took 3,000 user registrations, with server-side validation on every form.
- Built a user-generated review campaign microsite in Laravel and Bootstrap, with an admin panel so the client's team could manage entries without asking us for changes.
- Worked directly with clients to agree on scope, features and deadlines, often as the only developer on the project.
- Tracked down and fixed backend and database bugs on live client sites.

Projects

AI Blog Platform · React, Node.js, Express, MongoDB, Tailwind CSS, Gemini API · Live · Code

- Built a MERN blog with a JWT-protected admin dashboard. Admins create and edit posts, upload cover images through ImageKit, and approve reader comments before they go live.
- Connected the Gemini API so admins can generate a full first draft of a post, then edit it before publishing. Deployed on Vercel.

Swipe-Based 2FA System · React, Vitest, Python, scikit-learn, Firebase, Android · Code

- Team of 3, course project: an Android app that confirms a user's identity from how they swipe, using SVM and KNN classifiers.
- Built the React dashboard, which shows live touch data from the phone (screen positions and user details) as it comes in. The project has 232 automated tests across Pytest and Vitest.

Parser Fuzzing Tools · Python, coverage.py · Code

- Wrote a grammar-based HTML fuzzer that builds valid syntax trees and applies 8 kinds of mutations. Over 1,000 runs it caused 525 recursion crashes in a simulated parser; a random-mutation fuzzer caused none, because the parser rejected its input early.
- Ran a second fuzzer against Python's json module: of 5,000 generated inputs, 2,949 parsed, 1,377 were rejected cleanly and 674 (13.5%) crashed the parser.

Encrypted Chat · Python, Flask-SocketIO, RSA-OAEP · Code

- Real-time chat where each message is encrypted on the sender's machine with RSA-OAEP, so the server only ever passes along ciphertext.

Education

Master of Applied Science, Software Engineering · Memorial University of Newfoundland · St. John's, NL · Expected April 2027

Bachelor of Science, Computer Science · BRAC University · Dhaka, Bangladesh · 2020

Other Work Experience

Cash Office Supervisor · Sobeys · St. John's, NL · **May 2024 – Present**

- Reconcile about $4,000 in store cash and deposits each day, and find and correct discrepancies before end-of-day reporting.
- Trained about 10 new employees on cash office procedures and compliance; supervise the front-store cashier team during shifts.

Claims Customer Representative · Intact Insurance · **St. John's, NL · Nov 2022 – Apr 2024**

- Handled up to 30 claims a day across several internal systems, recording each case clearly enough for adjusters to act on it.
- Rated "Exceeds Expectations" in the 2023 performance review.

Certifications

- Professional Skill Development Program, Career Development, Memorial University, 2026
- Meta Front-End Developer Professional Certificate, 2023
- Google Foundations of User Experience Design, 2022
